I contracted CGI Development, Inc. to complete our 2,000 square foot retail upfit. I was provided with a written estimate and a time frame of when certain tasks would be completed. During the construction, David continuously called me to keep me informed of the entire process. He answered any questions I had and was always available if a problem did arise. The entire process was a very pleasurable experience. He and his team came in within budget and finished a week early to boot.

Opening up a new business is enough stress for any person. It was reassuring knowing that CGI Development, Inc. had my best interests in mind. I am very satisfied with the work completed by CGI Development, Inc. and have and will continue to recommend them.
